DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

1. A pharmaceutical formulation wherein an active agent has a first fraction suspended in a vehicle and a second fraction solubilized in a vehicle.
2. A pharmaceutical formulation wherein a first active agent has a first fraction suspended in a vehicle and a second fraction solubilized in a vehicle and additionally a second active agent that is solubilized or suspended in the vehicle.
3. A pharmaceutical formulation wherein an active agent has a first fraction suspended in a vehicle and a second fraction solubilized in a vehicle, which is substantially free of added water.
4. A pharmaceutical formulation comprising an active agent has a first fraction suspended in a vehicle and a second fraction solubilized in a vehicle, wherein the process of preparing the composition involves the step of coating the interfacial agent on the particles.
5. A pharmaceutical formulation comprising an active agent has a first fraction suspended in a vehicle and a second fraction solubilized in a vehicle, wherein the composition further comprises a means for segregating the first and second fractions.
6. A method for reducing the effect of food on absorption and bioavailability of orally administered agent to a patient.

Art Unit: 1615

7. A method for increasing the onset of therapeutic effect of an active agent and reducing time to apparent elimination.

8. A method for reducing the interpatient variability with respect to absorption and bioavailability

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
